The Quest for Longitude by Collection of Historical ...

Tompion had, in fact, made two year-going clocks with 13-foot pendulums for the Royal Observatory in Greenwich, England, that were finished in 1676. John Harrison's (1693-1776) chronometer, familiarly known as H. 4, proved that it was possible to solve the age-old problem of finding the longitude at sea by the use of an accurate timekeeper.

European Clocks in the Seventeenth and Eighteenth ...

The best illustrations and technical description of Harrison's grasshopper escapement that I've been able to find has been in the publication "The Quest for Longitude", ISBN 0-9644329-0-0, which is "The Proceedings of the Longitude Symposium, Harvard University, Cambridge, MA, Nov. 4 - 6, 1993". Edited by William J. H. Andrews.

Grasshopper escapement | NAWCC Forums

The longitude rewards were the system of inducement prizes offered by the British government for a simple and practical method for the precise determination of a ship's longitude at sea. The rewards, established through an Act of Parliament (the Longitude Act) in 1714, were administered by the Board of Longitude.. This was by no means the first reward to be offered to solve this problem.
