Something For Nothing Arbitrage And

In Something for Nothing, financial economist Maureen O'Hara explains that one of the key innovations of modern finance is its reliance on arbitrage, the practice of taking advantage of a price difference between two or more markets to generate profits and remove inefficiencies. When done correctly, arbitrage can create value at little or no cost (in effect, getting "something for nothing"); but it can also be an exploitative tool.

Something for Nothing. The innovation of modern financial markets has changed the world of finance, but the legal structure tends to lag behind dramatically, according to O'Hara. This led her to write Something for Nothing: Arbitrage and Ethics on Wall Street (W. W. Norton & Company, 2016). "In the university setting I feel we need to be very clear about the things that don't make markets better—about activities that take advantage of the fact that the legal structure always lags ...
